DISTRIBUTION TRANSFORMER MANUFACTURER

LEMI TRAFO is a leading, fast-growing and fully private Bulgarian company, established in 1996. Our main activity is the design and manufacture of modern three phase distribution and special type transformers. The company is very well equipped with all necessary technological and production equipment which assure production of modern transformers. Now our production range and capacity cover oil-immersed and cast resin transformers for insulation class up to 36kV, with standard and reduced losses.
